Email to the District's Data Protection Officer

Great Neck lists Joseph Cangialosi as Data Protection Officer on its Data Privacy and Security page (Office of Instructional Technology). Send to him; copy the Office of Instructional Technology if the site lists a general address. Fill in the brackets.

To: jcangialosi@greatneck.k12.ny.us **Subject:** Studento (free bell-schedule app): Ed Law 2-d materials for vetting

Dear Mr. Cangialosi,

I'm a Great Neck parent (my son is at Great Neck North) and the developer of Studento, a free app that counts down to the next bell and shows a student's own class schedule, with widgets and quiet bell reminders. It is on the App Store now (https://apps.apple.com/app/studento/id6825547011). The principal suggested I bring it to your office, since the district vets both free and paid software under Education Law 2-d before it is used with students.

I'd like to propose a small pilot at North High School this year. To make the vetting easy, I've attached everything Part 121 and Board Policies #8625 and #8635 call for from a vendor:

1. **Data Privacy and Security Plan**: data inventory, where it is stored (Cloudflare, US), security measures (TLS in transit, encryption at rest, PBKDF2-SHA256 password hashing, one admin, kill switches), and breach notification to you within 7 days.
2. **Parents' Bill of Rights supplemental information**, filled in and signed.
3. **Data inventory and security summary**, verified against the current code.
4. Privacy policy: https://studento-app.pages.dev/privacy. Source code is public: https://github.com/theprojectmaker/studento-ios.

The short version: Studento needs nothing from the district and works fully without an account. If a student chooses to create one, it holds only a student-chosen username and their own class names and settings. No name, email, phone, location, ads, analytics or trackers. Students can delete their account and all data inside the app. For a pilot I can also ship it with account creation turned off.

Three questions so I fit your process:

1. Would you send me the district's Data Privacy Agreement (I see the free tools on the GNPS approved list carry a "District - Free" DPA)? I'll return it signed with the plan attached.
2. Which devices do North students use in school, iPads or Chromebooks? The iOS app can be pushed through Apple School Manager; I can provide a web version for Chromebooks.
3. For a pilot, would you prefer a TestFlight beta link for a few teachers and students, or the App Store build pushed to a pilot group of district iPads?

Happy to come in for a short demo or to answer anything from your team.

Thank you, [Your name] [Phone] studentoclockapp@gmail.com
