Email to the district Director of Technology

Fill in the brackets. Copy the Data Protection Officer if the website lists one. Attach `PARENTS-BILL-OF-RIGHTS-SUPPLEMENT.md` and `DATA-INVENTORY.md` as PDFs (print to PDF from any Markdown viewer, or ask and I will export them).

Subject: Studento bell countdown app: request to add to the approved app list

Hi [Name],

I'm a parent at Great Neck North High School, and I built a free app called Studento that counts down to the next bell and shows a student's own schedule, with widgets and quiet bell reminders. [Principal name] suggested I bring it to you, since app approvals and Ed Law 2-d go through your office.

The short version on privacy:

- Everything runs on the device. No account is needed; the optional account holds only a student-chosen username and the student's own class names.
- No names, emails, phones, location, photos of students, ads, analytics or trackers.
- Encrypted in transit and at rest, hosted in the US, in-app account deletion, and the source code is public.
- I've attached a filled-in Parents' Bill of Rights supplement and a data inventory, and the privacy policy is at https://studento-app.pages.dev/privacy.

Three questions so I can fit your process:

1. Do you need a signed Data Privacy Agreement for an app that works without any account? If so, please send the district's DPA and I'll return it signed.
2. Which devices do students carry at Great Neck North High School: iPads, Chromebooks or both? Studento is on the iOS App Store [link once live]; I can provide a web version for Chromebooks.
3. If approved, would you push it through Apple School Manager / Jamf or Mosyle, or put it in Self Service for students to install themselves?

Happy to come in, do a short demo, or answer anything from your data protection officer.

Thanks, [Your name] [Phone] studentoclockapp@gmail.com
